Accelerate and Control your Supply Chain Processes

IQX Supply Chain Apps for SAP Fiori are a suite of mobile enabled Fiori Apps to automate your supply chain operations that are both quick to deploy and flexible to adapt to your unique requirements.

FUNCTIONS

- **New Product Introduction** - gather all the necessary inputs and approval to create new material masters.
- **Vendor Engagement** - on-board new vendors quickly and allow them to maintain their details, certificates and to view order, invoice and payment histories.
- **Purchase Requests** - enable collaboration and review of purchase requests prior to financial approval.
- **Goods Issue and Transfer Requests** - easy to use goods receipt and movement requests.
- **Inventory Monitoring, Counts and Adjustments** - improve inventory accuracy, visibility and accelerate your counts with easy to use mobile-enabled apps.

FEATURES

- **Ready to run** web and mobile apps for a fast-start.
- Based on **SAP Fiori** for a familiar and consistent end-user experience.
- **Highly configurable** data model to meet your reporting needs.
- **Excel integration** to load your bulk data and movements, and to analyse your transaction histories.
- Easy to maintain **automated workflow** to ensure that requests are routed appropriately for approval.
- **Mobile approvals** to expedite time-critical requirements.
- Integrated with SAP **document management** system to ensure that attachments are accessible and secure.
- **Deep SAP integration** to avoid duplication of master data or business rules.
- Fine-grained SAP access controls and encryption mean that sensitive financial data is highly **secure**.

BENEFITS

- **Accelerate** finance processes with fully digital forms and workflow automation to ensure customer satisfaction and profit maximisation.
- **Enforce compliance** with procurement policies to develop more strategic vendor relationships and to minimise costs.
- Reduce administrative overhead and training by enabling end-users and business partners to **self-serve**.
- Improve **accuracy and productivity** by automating validations at point of entry, and by consistently updating master data and transactions based on your business rules.
- Quick, **low-risk** and cost-effective to deploy.
- Do your own **customisation and enhancement**.
