## WHAT IS IQX APPBUILDER?

IQX AppBuilder for SAP Fiori (FAB) is an SAP-certified add-on to rapidly tailor IQX Business Process Solutions to meet your unique business process requirements.

FAB provides an integrated workbench that facilitates:

- User-interface Adjustments:
  - > Include your unique informational needs including classifications and justification texts
  - > Apply your unique data-entry validations and standard derivations
- Process Optimization:
  - > Stage requests to allow collaboration with others before submission
  - > Provide business-maintainable approval matrices
  - > Manage, track and report on process histories
- Integration:
  - > Combine multiple transactions together in an orchestrated business process
  - > Incorporate your unique external systems
  - > Accommodate your configuration and custom enhancements

FAB supports an agile implementation approach to ensure your end users get quality robust apps that meet business objectives quickly, reliably and cost effectively. Internal IT resources can support and enhance apps leveraging existing ABAP and Fiori skills.

**Tailoring with IQX AppBuilder is  
10x faster than starting from scratch!**

If you have implemented S/4HANA, or are still planning to, whether you have any existing Fiori Apps or not, FAB is available for you to further customize IQX Business Process Solutions for exceptional value in the following areas:

### PROCESS

Capital Expenditure Management from idea to asset including:

Project Procurement and Contract services including:

A broad range of bespoke process solutions for example:

### FIORI APPS

- Budget Requests and annual business planning
- Capital Expenditure Requests
- Forecasting
- Project Completion and Asset Capitalization
- Asset Transfer, Disposal, Revaluation and Verification

- Vendor on-boarding through the IQX vendor-portal SaaS solution
- Vendor management know-your-counterparty and certificate management
- Easy to use purchase requisitions that apply your procurement policies including contract pricing
- Goods and Services entry sheets
- Asset and Material Master Data Management

- Timesheets
- Corrective Actions
- Mobile production-floor scanning
- Boardroom analytics
- Many more to choose from

## ENABLE YOUR TECHNICAL TEAMS

IQX AppBuilder for SAP Fiori (FAB) leverages your existing technical team to be able to:

- Configure low-code apps OR build complex process digitalization solutions
- Integrate easily with Excel and third-party applications
- Accommodate your unique data fields without customizing SAP
- Enable multi-step data collection and approval processes prior to updating SAP
- Provide easy-to-administer approval matrices to drive your workflow logic
- Approve all tasks via email or the OneList mobile app
- Consolidate all user requests into a single outbox
- Monitor approval audit trails for policy compliance
- Deliver self-service analytics to end-users

## EXAMPLES OF BUSINESS OUTCOMES IQX CLIENTS HAVE ACHIEVED WITH IQX APPBUILDER

**Santos**

Invoice matching and goods receipting, express requisitioning.

TOYOTA

Capital budgeting, project approvals, project forecasting and asset creation.

Journal adjustments, cause and prevention analysis, prompt payments.

## WHAT IS YOUR NEXT STEP?

### CONSIDER THESE QUESTIONS:

- Do you still need to demonstrate the value of Fiori to executive sponsors?
- Are your end-users underwhelmed by the out-of-the-box Fiori Apps?
- Are you struggling to meet the demand for tailored Fiori Apps?
- What Excel and SharePoint forms are you still using to drive SAP transactions?
- How do you initiate requests, collaborate with stakeholders, capture supporting data & documents for project procurement?
- Where are you falling short in terms of corporate process or regulatory compliance?

**Most companies are still using spreadsheets, email, SharePoint or even paper forms to manage internal processes resulting in inefficiencies, delays, errors and lack of control and visibility.**
